

# Coos Bay Rail Line

Operated by Oregon International  
Port of Coos Bay

## ***Making Connections***

The Coos Bay Rail Line is a 134-mile short line railroad owned and operated by the Oregon International Port of Coos Bay, connecting Southwest Oregon to the Union Pacific Interchange Yard in Eugene. Access to intermodal transportation is crucial in supply chain management to ensure efficient reach while containing cost. The CBRL provides a critical link for rail customers to connect to the deep draft harbor at the Port, enhancing the safety, connectivity, long-term efficiency, reliability, and cost-competitiveness of freight movements to and from Southwest Oregon.

# THE COOS BAY RAIL LINE ADVANTAGE

Operating and  
Owning

Holistic and  
Systemic Rehabilitation

Tying Routine Maintenance to  
Capital Investment Projects

Transparency and  
Accountability

Grant and  
Reinvestments

## PROVIDING A WAY

## GLOBAL REACH

The CBRL offers rail customers a cost-effective, environmentally sound, and reliable source of transportation to national and international markets. The Oregon International Port of Coos Bay supports international trade through its ability to transfer freight between oceangoing vessels and inland freight corridors. A healthy and vibrant railroad is a key element for existing and future movements of goods. Rail transportation remains an essential means of moving freight to domestic and international markets. With a full multi-modal transportation system, the Port is working towards investment in infrastructure, technology and environmental sustainability that will build a Port prepared for future.

## CULTURE OF SAFETY

Safety is the top priority of the Coos Bay Rail Line. The Port promotes and integrates safety into all aspects of operation. The Port has invested over \$60 million into revitalization of the rail line since 2010, with another \$30 million in funding committed. Commitment to productivity and reliability, while ensuring the safe movement of cargo are key elements in ensuring stable business growth for the Port and its customers – both future and existing.

## PARTNERSHIP

The rail line is an economic engine in southwestern Oregon, supporting direct employment at rail served industries with family wage jobs. In addition, ongoing capital investments in infrastructure projects generate local job opportunities and support local businesses. The Port serves as a hub; connecting organizations, agencies, and communities. As the Port continues to grow, the Coos Bay Rail Line will continue to be an essential competitive edge.
