

Utilities

Wilson County is well-equipped to provide support services for its expanding industrial and commercial businesses.

We are proud to say that Middle Tennessee Electric rates are lower, on average, than the rates of electric companies that serve Memphis, Nashville, Knoxville and Chattanooga.

Below you will find a table listing each utility provider by municipality. If you should have any problems locating the correct utility information for your current or future business site, please contact the JECDB staff for further assistance.

LEBANON
